

Nihal Adhikari

Frontend / Angular Developer

nihaladhikari998@gmail.com | +91 08794330609 | linkedin.com/in/Nihal-Adhikari | github.com/Nihalad998

PROFESSIONAL SUMMARY

Results-driven **Frontend / Angular Developer** with **almost 3 years of experience** architecting and delivering enterprise-grade, scalable web applications using **Angular (14+)**, **TypeScript**, and **RxJS**. Proven track record of improving application performance by up to **25%** through **lazy loading**, **optimized change detection**, and modular component architecture. Skilled in **REST API integration**, **Reactive Forms**, **route guards**, and interceptors. Experienced collaborator in **Agile/Scrum** teams with a passion for clean, maintainable, and user-centric code.

TECHNICAL SKILLS

Core Framework: Angular 14+, Angular CLI, Angular Material, Lazy Loading, Route Guards, Interceptors, Reactive Forms

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3

State & Reactivity: RxJS, Observables, Subjects, async pipe, Change Detection Optimization, Angular Signals

UI / Styling: Angular Material, Tailwind CSS, Bootstrap, Responsive Design, CSS Flexbox & Grid

Testing: Jasmine, Karma, Unit Testing, API Testing (Postman)

DevOps & Tools: Node.js, Git, GitHub, GitLab, Webpack, npm, Jira, Firebase

Backend / Database: Java, Spring Boot, RESTful APIs, MySQL

PROFESSIONAL EXPERIENCE

System Engineer — Frontend / Angular Developer — Infosys | Chandigarh *Feb 2022 – Nov 2024*

- **Architected** and developed enterprise-scale **Angular (14+)** applications using modular, component-based design patterns, reducing code duplication by **~30%**.
- **Integrated REST APIs** using **RxJS Observables** and operators (**switchMap**, **debounceTime**, **catchError**), enabling reactive, non-blocking data flows across the application.
- Improved initial load time by **25%** by implementing **lazy loading modules**, preloading strategies, and optimized **Angular routing** configurations.
- Built complex **Reactive Forms** with custom and cross-field validators, reducing form-related UI bugs and improving input accuracy by **40%**.
- Developed reusable **UI component libraries** using **Angular Material** and Bootstrap, ensuring a consistent design system and reducing development time for new features.
- Implemented **HTTP interceptors** for centralized error handling, **JWT authentication**, and request/response logging, improving app security and observability.
- Ensured **cross-browser compatibility** and pixel-perfect **responsive design** across Chrome, Firefox, Safari, and Edge on mobile and desktop viewports.
- Configured and maintained **Webpack** build pipelines and **Angular CLI** tooling, cutting production build times through optimization flags and tree-shaking.
- Participated in **Agile/Scrum** ceremonies — sprint planning, code reviews, architectural discussions — collaborating with backend, QA, and product stakeholders.
- Used **Git/GitLab** for version control, branching strategies, and code reviews; tracked tasks and defects via **Jira**.

Angular Developer — Freelance — Self-Employed | Remote *Dec 2024 – Present*

- Delivered production-ready **Angular** applications for clients, translating requirements into scalable, maintainable codebases with **Angular 14+**, **TypeScript**, and **RxJS**.
- Designed and published shared **Angular component libraries** and services with clear APIs, accelerating feature delivery across multiple projects.
- Integrated **RESTful APIs** with proper authentication flows (**JWT/OAuth**), error handling, and optimized data-loading strategies (caching, pagination).
- Implemented **lazy loading**, **route guards**, and **HTTP interceptors** for security hardening and measurable performance improvements.

- Optimized Angular rendering performance using **OnPush change detection**, **async pipe**, and **trackBy**, reducing unnecessary re-renders by up to **50%**.
- Maintained code quality through **unit testing (Jasmine/Karma)**, refactoring sessions, and peer code reviews.

KEY PROJECTS

Study With Me — Angular 18 Productivity Dashboard | <https://studywith-me.netlify.app/>

- Built a full-featured productivity dashboard using **Angular 18**, **TypeScript**, **Angular Signals**, **Tailwind CSS**, and **Chart.js** to help developers and students manage focus sessions and goals.
- Implemented a **Pomodoro-style focus timer** with circular SVG progress ring, start/pause/reset controls, keyboard shortcuts, and fullscreen focus mode.
- Designed a **goal management system** with priority levels, completion tracking, and **LocalStorage persistence** for data durability across sessions.
- Developed an **analytics dashboard** with weekly focus trend charts, session history, and total focus hours using **Chart.js** and **ng2-charts**.
- Leveraged **Angular Signals** for reactive state management and **OnPush change detection** to minimize unnecessary re-renders and optimize runtime performance.

Project Management System (Trello-Clone)

- Built a full-featured task management app with **role-based access control**, task assignment, due-date tracking, and real-time notifications.
- Architected **RxJS-driven state management** with **BehaviorSubjects** for live board synchronization across users.
- Integrated **Firebase Realtime Database** for instant push notifications and data persistence.
- Implemented **drag-and-drop** task boards using the **Angular CDK DragDrop** module, improving UX and productivity.

Personal Portfolio Website

- Designed and developed a responsive **Angular + Bootstrap** portfolio with **lazy-loaded feature modules**.
- Integrated **Firebase Hosting** and Cloud Functions for contact form submission and static asset delivery.
- Achieved **95+ Lighthouse performance score** through optimized routing, asset compression, and CDN caching.

EDUCATION

Bachelor of Technology — Computer Science Engineering

Graphic Era Hill University, Dehradun

2018 – 2022
